

Public Notice

Markdale Water System Users

Markdale Water System Hydrant Flushing Program

Starting July 31, 2017

Town crews will be flushing all hydrants as part of our annual water main maintenance program.

All areas of the Town will have water mains flushed. The work will be completed in four quadrants split by Highway 10 and County Road 12. The flushing in each will take approximately five days to complete and may temporarily result in cloudy water conditions.

Please be assured the quality of the drinking water will not be affected, although it may be necessary to run your tap for a short period of time and possibly remove and clean the tap screen.

Your understanding and cooperation is greatly appreciated.

Should you have any questions, please contact our Public Utilities Department at (519) 986-4784.

Respectfully,

Shawn Moyer
Director of Public Utilities
Municipality of Grey Highlands
