

What is unique is what should be the focus of planning  
Sustainability - the natural beauty and the opportunity for many to

Tranquil

enjoy and appreciate it  
maintain beauty create a stewardship, ribbon of wilderness, for  
outdoor opportunities everyone, forever (cribbed from BT)

this is Donna's test

Unspoiled beauty

preserve the fragile and unique aspects  
Stewardship, Cross-servation  
Ecotourism, low density, outdoor focus,  
Wilderness Flora, Respected  
artisan focus  
Green

memorable experiences in nature

Protected

nonmotorized

Unique, welcoming,  
natural beauty

Ecosystem, Natural, Outdoor Low impact  
activities

Wildlife corridor. Wilderness protection  
ecosystems found here with  
Hiking paradise Affordable for locals/  
lower income people  
retains rural flavour.

Land first, wildlife  
second, then community  
economic development in  
support of 1 and 2

Proactive

Houses over 3,000  
peaceful, spiritual  
square feet should be  
sanctuary, fragility, diversity

Keep it simple - preserve and protect the Valley and make it accessible while encouraging/enabling local businesses.

don't ruin land and wild places to build things for humans

primary principle is long term stewardship

development that honours the past, looks to safely build the future, puts the environment first

balance between development and the environment

Keep in mind who our neighbours are... not necessarily human.

Seven Generations concept

limits to growth

Businesses that do not need help from the government... able to sustain themselves.

limited development  
balanced

incorporates the idea of equity - everyone can benefit
